Tubes

Extraction Tube

- Extraction Tube is designed for use with swab-based assays, such as COVID-19, and enables the dispensing of buffer solutions for sample extraction. Its intuitive design allows for easy transportation and enhances user convenience.

Product Information

Cat No.	Type	Material	Color	Volume
96572(B)	Bottle	LDPE	Translucent	3ml
96572(C)	Cap	PP	White	
96572(N)	Nozzle	HDPE + Hydrophobic Filter	Translucent	

VTM Tube (Virus Transport Media Tube)

- VTM (Viral Transport Medium) tube is a diagnostic and research tool designed for the maintenance and transportation of viruses, chlamydia, and other media. It allows for the sampling of 1-3ml and can be utilized in various ways, making it a versatile asset in the field of research and diagnostics.
